

Magic cleaner

SIMPLE AND EFFECTIVE CLEANING FOR YOUR GUITAR CUTTER

STATICE TEMPERING has developed an innovative tool specifically designed to easily clean guitars cutters with a 7.5mm string spacing (as well as its multiples: 15 mm, 22.5 mm, 27.5 mm, and 30 mm) easier and more efficient.

Thanks to the flexibility and perfectly adapted shape of its silicone scraper, the Magic Cleaner removes accumulated chocolate on the strings in a single pass.

The collected chocolate can then be recycled.

The Magic Cleaner comes with two spare silicone scrapers.

Replacing the scrapers is quick and tool-free.

AVANTAGES :

Efficient: the silicone scraper profile perfectly conforms to the strings

Time-saving: only one pass is needed

Cost-effective: return on investment in less than a year through chocolate recycling

Easy to clean: materials are dishwasher-safe or can be cleaned with soapy water | non-stick silicone

CARACTÉRISTIQUES TECHNIQUES :

- Premium stainless steel #316L
- Silicone food grade
- Dimension : 375 mm (suitable for a standard guitar cutter)
- Weight : 500g
